

A PACKAGED SOLUTION FOR YOUR TIME AND ATTENDANCE

This secure, password protected system allows you to reduce time spent by Manager on nonproductive administrative task thereby improving your accuracy and productivity.

No matter what method of Data Collection Device you choose, **Timepaq** makes it easy to collect employee time information. Data Collection Devices will either deliver the data immediately or store the time punch information for transmittal to **Timepaq** at a more convenient time. Even if you need to mix Data Collection Terminal choices, you'll find that **Timepaq** supports your needs and your environment.

Use Automation and let the computer do the work for you. **Timepaq** can collect the time information during the night (scheduling), and it'll be ready for you in the morning when you arrive. **Timepaq** Communications is designed so that you can just set it up once and let it run on it's own from there.

Evaluating your employee time information before printing it, is always beneficial. It allows you to identify missed punches or erroneous entries. We have built a comprehensive editing tool that allows to make any adjustments or corrections you wish, and will automatically alert you to any problem areas. In addition, the screen instantly displays the work period totals for any employee selected. Totals include total work hours, total overtime availed etc.

Drop down menus, time calculator, and automated reporting save time and greatly increase reporting accuracy

Multiple Methods could be used to capture the Time and Attendance Data like Magnetic stripe readers, Barcode Readers, Proximity Readers, Smartcard Readers, Hand Geometry, Fingerprint and Face Recognition readers.
