

# WI 200

WI-200 is one of the renowned model of the clock in system machine and one of the best in our comprehensive array of Biometric Fingerprint Machines, which is in compliance with latest industry standards. Also known for providing accurate fingerprint reading and reliable matching results.

Suitable for the application of inconvenient remote network, adopt U disk to download and upload time attendance system record & photos conveniently.

It has Elegant workmanship, Multi-identification methods, can meet user individual requirement. Proximity card, fingerprint, password, of which functions can be chosen freely combined for identification.

## TECHNICAL SPECIFICATIONS;

Platform M500 (8M Flash)  
CPU 32bit 6001 Microprocessor  
Algorithm 2007 Version Finger VX8.0  
Sensor: SecuGen/Optical sensor.  
Identification 1:1 or 1:N  
TFT dimension: 3.5"  
TFT display: 65,000 true color  
TFT resolution: 320\*240  
I/O Interface RS232/485, TCP/IP,  
USB Host, USB Client  
Standard Function Access control  
(wiegand26 In and wiegand26 out,  
time zone), 8 user-defined Function  
Key, Short Message, Schedule Bell, T9.
